

SUMMARY

Results-oriented Site Reliability Engineer and DevOps Engineer with 3 years of hands-on of experience in maintaining and improving the reliability, scalability, and performance of complex distributed systems. Proficient in using industry-leading tools and SIEM technologies to optimize infrastructure and automate operational tasks. Skilled in incident management, monitoring, and deployment automation, having successfully reduced downtime and increased system availability. Strong problem-solving and collaboration abilities, ensuring seamless operations for high-traffic web applications.

SKILLS

Operating Systems-
Linux (Red hat,
CentOS), Windows

Automation-
Terraform (IaC),
Ansible

Web Hosting and
Load Balancing-
Apache, Nginx

Monitoring and
alerting

System
troubleshooting

Collaboration Tools
Git, Slack, Jira,
Confluence

Containerization:
Docker, Kubernetes

Scripting Languages:
Bash, Python, YAML,
JSON

Cloud Technologies:
AWS. Azure

Monitoring tools-
Grafana

EXPERIENCE

Site Reliability Engineer

Securonix Mar 2023 - Present

• Deployed and managed AWS resources including EC2, S3, RDS, CloudWatch, VPC, AMI, VPC Peering, and NAT Gateway.

• Utilized AWS services such as Elastic Load Balancing, Auto Scaling, IAM, CloudFront, CloudFormation, and CloudTrail.

• Developed documentation for regular issues to streamline troubleshooting and reduce resolution times.

• Improved system reliability and performance through proactive monitoring and optimization.

• Delivered high-quality production support, ensuring minimal downtime and maximum client satisfaction.

• Actively worked on Automation

• Managed file systems, swap partitions, user and group administration, job automation, and remote system administration.

• Enhanced user security with SUDO and managed packages using yum and RPM.

• Handled NFS server setup, backup and restore processes, and network configuration.

• Automated the installation of software into multiple VMs leveraging AWS Services Bash Big Data Cent OS CI/CD Cloud Security Ansible and Docker containers Red hat 9.

• Collaborated with cross-functional teams to debug and optimize script code.

• Monitored Jenkins Pipelines and builds across multiple environments.

• Worked closely with the engineering team on deployment issues in Kubernetes clusters.

EXPERIENCE

Associate Cyber Threat Content Operations Engineer

Securonix Mar 2022 - Apr 2023

- In my role, I focus on manual mapping, parsing, and monitoring, while also developing new parsers based on log data. Additionally, I ensure the security content of the logs is updated in accordance with the Standard Operating Procedures (SOP) and official documentation.
- To enhance the effectiveness of policy management, it is essential to concentrate on the following key areas: labels, the data dictionary and the tendency to map the legal updates on the the logs. This approach will significantly improve the performance and compliance of policies.

Education

A.I for Digital Business & E- commerce

Indian Institute of Technology, Roorkee Jan 2021 - Oct 2021

Bsc Mathematics

Sri Ramakrishne Mission Vivekananda College Apr 2010 – Nov 2015
