Professional Summary

- ✓ 15 years of professional IT experience looking for AWS Cloud engineer, devops roles and Bigdata administration positions and having experience with Bigdata Technologies, DevOps Tools and Cloud Technologies (AWS and Azure).
- ✓ Working on migration projects from OnPrem to Cloud (AWS).
- ✓ Experience with multiple DevOps tools like GIT, Bitbucket, Docker, Kubernetes, CI/CD, Jenkins, Ansible, Terraform.
- ✓ Cloud experience with AWS and Azure
- ✓ 10+ years of experience with Bigdata Administration with Cloudera, EMR clusters.
- ✓ Hands on experience in setting up Cloud network, VPC, subnet, Peering.
- ✓ Hands on experience in installation, configuration, supporting and managing Hadoop Clusters.
- ✓ Hadoop Cluster capacity planning, performance tuning, cluster Monitoring, Troubleshooting.
- ✓ Decommissioning and commissioning the Node on running hadoop cluster.
- ✓ Expertise in HDFS Architecture and Cluster Concepts.
- ✓ Expertise in Hadoop cluster Planning and providing summarized report.
- ✓ Backup configuration and Recovery from a NameNode failure.
- ✓ Installation of various Hadoop Ecosystems and Hadoop Daemons.
- ✓ Knowledge of cluster coordination services by using Zookeeper Quorum.
- ✓ Experience in minor and major upgrades of hadoop and hadoop eco system.
- ✓ Experience monitoring and troubleshooting issues with Linux, CPU, OS, storage and network.
- ✓ Good experience on Design, configure and manage the backup for Hadoop data.
- ✓ Configured various property files like core-site.xml, hdfs-site.xml, mapred-site.xml based upon the job requirement
- ✓ Expertise in Hadoop job schedulers such FIFO, Fair scheduler and Capacity scheduler.
- ✓ Having knowledge in Rack Awareness and Speculative Execution.
- ✓ Experience in tuning the Linux parameters required for Hadoop clusters.

- ✓ Hands on experience with Linux administration.
- ✓ Capability of adapting to new technologies.
- ✓ Working as Team lead and managing team 12+ members for Offshore team.
- ✓ Reviewing team management and team performance reviews
- ✓ Review team members individual performance on support and assigned tasks and review of performance appraisal to team manager.
- ✓ Review and manage the SLA/SLO and assist team if required any further help on support tickets.
- ✓ Handling customer escalated tickets.

Educational Qualification

- ✓ MCA from University of Madras - 2004
- ✓ Bachelor's degree in Computer's science B.Sc (Computers) from Nagarjuna University – 2001

Organizations Worked

- ✓ Worked as Senior Site Reliability Engineer in **Securonix India Pvt Ltd**, Bangalore from June 2021 to Jan 2025.
- ✓ Worked as Data Engineer in **DXC Technology**, Bangalore from Aug 2018 to June 2021.
- ✓ Worked as a Senior Software Engineer from July 2011 to June 2018 at **IBM India Pvt Ltd**, Bangalore thru Magna infotech Pvt Ltd.
- ✓ Worked as a Process Specialist from January 2009 to March 2011 at **Infosys BPO Ltd**, Bangalore.

Technical Proficiency

- ✓ **Cloud** : **AWS, Azure, Azure Devops, EMR Clusters.**
- ✓ **DevOps Tools** : Azure DevOps, Docker, Kubernetes, GIT, Jenkins, Ansible
- ✓ **DevOps Tools** : Azure DevOps, Docker, Kubernetes, GIT, Jenkins, Ansible
- ✓ **Hadoop Framework:** Hadoop, Sqoop, Hive, HBase, Kafka, Solr
- ✓ **Hadoop Security** : Kerberos, Rangers, Sentry & Knox
- ✓ **Hadoop distributions:** Cloudera, Hortonworks & MAPR Distribution
- ✓ **Databases** : My-Sql and NoSQL (HBASE).
- ✓ **Operating Systems** : Windows, Linux
- ✓ **Scripting languages** : Shell Scripting.
- ✓ **Packages** : Ms Office (word, Excel, Power point).
- ✓ **Tools** : Nagios, MCS, Cloudera Manager, Ambari

Professional Experience

#Project 1:

Project : SAAS (Securonix as a Service- Security management tools)
Duration : June' 2021 – Jan'2025.
Role : Sr. SRE
Work Location : Bangalore
Environment : AWS EMR, Hadoop, HDFS, HBase, Kafka, Kubernetes, EKS

Roles & Responsibilities:

- ✓ Responsible for Create and maintain EMR clusters for Clients in cloud (AWS and Azure).
- ✓ Maintaining cluster health and HDFS space for better performance.
- ✓ Rebalancing the Hadoop Cluster.
- ✓ Monitor HBase, Kafka clusters health and take necessary actions if any issues.
- ✓ Creating Kafka topics based on client requirements.
- ✓ Experienced in managing and reviewing Hadoop log files.
- ✓ Working with multiple teams for P1 tickets for all hadoop related issues.
- ✓ Involved on Kafka rebalance activity for multiple customers.

Professional Experience

#Project 2:

Project : Daimler
Duration : Aug' 2018 – June 2021.
Role : Hadoop Admin (MAPR Distribution) with Devops tools
Work Location : Bangalore
Environment : Hadoop, HDFS, Hive, Sqoop, Zookeeper, Mapr-Posix client, Docker, Kubernetes, Jenkins, GIT, Bit bucket, Ansible

Roles & Responsibilities:

- ✓ Responsible for commissioning and decommissioning of nodes from Clusters
- ✓ Maintaining cluster health and HDFS space for better performance.
- ✓ Rebalancing the Hadoop Cluster.
- ✓ Involved in minor and major upgrades of hadoop & hadoop eco system
- ✓ Allocating the name and space Quotas to the users in case of space problems.
- ✓ Installation of various Hadoop Ecosystems and Hadoop Daemons.

- ✓ Experienced in managing and reviewing Hadoop log files.

#Project 3:

Project : EC (Energy Components)
Duration : Jan' 2015 – June' 2018.
Role : Hadoop Admin
Work Location : Bangalore
Environment :Hadoop, HDFS, Hive, Sqoop, Zookeeper, Cloudera, Kerberos,

Roles & Responsibilities:

- ✓ Hadoop Clusters Installation.
- ✓ Collaborated with multiple teams for design and implementation of Hadoop clusters
- ✓ Responsible for commissioning and decommissioning of nodes from Clusters
- ✓ Maintaining cluster health and HDFS space for better performance.
- ✓ Configured various property files like core-site.xml, hdfs-site.xml, mapred-site.xml based upon the job requirement
- ✓ Rebalancing the Hadoop Cluster.
- ✓ Working on Namenode high availability customizing Zookeeper Services.
- ✓ Involved in minor and major upgrades of hadoop & hadoop eco system
- ✓ Allocating the name and space Quotas to the users in case of space problems.
- ✓ Installation of various Hadoop Ecosystems and Hadoop Daemons.
- ✓ Involved in Installing and configuring Kerberos for the authentication of users and hadoop daemons.
- ✓ Created charts and Dashboards in cloudera manager UI.
- ✓ Experienced in managing and reviewing Hadoop log files.
- ✓ Implemented Kerberos integration with AD.
- ✓ Implemented High availability for Cloudera Manager.

#Project 4:

Project : APO Tunisia
Duration : July 2014 – Dec 2014
Role : Implementation & Support Engineer
Work Location : Bangalore
Environment/Tools : Primavera P6

Description

Amilcar Petroleum Operations (APO) is joint venture of Shell & disconnected from the Shell IT landscape. APO is a group of applications those are used in Oil & gas petroleum refineries. Primavera, Maxvera, Maximo, PI, TIBCO, IFM, Synergi these are the mainly used in oil and gas business applications used.

Roles & Responsibilities:

- ✓ Prepared HLD for Primavera P6 & Maxvera applications
- ✓ Installation & Configuration of Primavera P6 & Maxvera applications
- ✓ Application Upgrade as per the vendor for Primavera application.
- ✓ Coordination with third parties like DBA, Network & Server team to setup environment.
- ✓ Worked on Unit & Integration testing
- ✓ Prepared DLD & QG6B deliverables
- ✓ Go-live/Production Support for hyper-care period

#Project 5:

Project : GAME – Primavera P6.
Duration : July 2011 – June 2014
Role : Production support engineer
Work Location : Bangalore
Technologies : Primavera-P6, Oracle, SQL Server 2008.

Description

GAME project is a group of applications those are used in shell petroleum refineries. Mainly Smart plant instrumentation & smart plant explorer, InView& InAudit applications. Smart plant application is used for to store and use for later the details of refinery and plant maintenance activities and other turn around details.

Roles and Responsibilities:

- ✓ Understanding the user issues and resolved the incident received via HP tool (SM7).
- ✓ Working on Incident and change management for higher version upgrades and release of hot fix versions.
- ✓ Coordination with vendor & user if any more database related issue on a site.
- ✓ Coordination with third parties like DBA (T-Systems), Network (AT&T) teams to resolve the high severity incidents.
- ✓ Coordinate with Citrix team (HP) is any issue for accessing SPI application via

- Citrix web portal.
- ✓ Involved in handling DB backup data requested for vendor investigation on site issues.
- ✓ Involved in Interface issue handling for (GSAP – SPI).
- ✓ Support for 24/7 for three regions (Asia-Pac, Europe & Americas).
- ✓ Support for Sunday Qatar region.

#Project 6:

Project : Integrated Project Management (IPM+), Infosys Technologies
Duration : January 2009 – March 2011
Role : Production support engineer
Work Location : Bangalore
Technologies : .Net, SQL Server 2008.

Description

IPM+ (Integrated Project Management) offers an integrated platform for effective and efficient, enterprise-level, project, and Program management. With Infosys' rapid growth, many new services are added to the portfolio continually. IPM+ provides an agile framework which can enable quick deployment of new processes. IPM+ provides a highly customizable, comprehensive software framework that provides various stakeholders with their own role-based view. In short, IPM+ is designed to enable the way people work in Infosys.

Roles and Responsibilities:

- ✓ Involved in Coding and Unit Test.
- ✓ Involved in HLD and LLD design.
- ✓ Responsible for weekly reviews and monthly reviews.
- ✓ Involved production support.
